

Polaris' Stock 4 Bolt Ski ---- Use Woody's 3 Bolt Runner

Your Polaris stock skis will come from the factory with either a three or four bolt runner. All Woody's replacement 1225 runners for Polaris ski's will only have three bolts.

The 1225 runner with three bolts will fit Polaris skis with the three AND the four bolt pattern.

If the stock Polaris runner you remove has four bolts-the Woody's 1225 replacement runner will not have a bolt to insert in the first hole at the front of the ski. The front of the runner will tuck into the ski and hold the runner secure. The Woody's 1225 three bolt runner will align with the three holes starting from the back of the ski.

Woody's made the 1225 series with three bolts so they will fit any Polaris stock runner. This applies to Single 1225, Dooly™ 1225 and Slim Jim® 1225.

| | 1225 Single | 1225 Dooly™ | 1225 Slim Jim® |
|--|-------------|-------------|----------------|
| (H) - Hardweld Top-Stock™ | HSP-1225 | N/A | N/A |
| (E) - 4" 60° Carbide Extender Trail III™ | EPI3-1225 | DP4-1225 | SP4-1225 |
| (T) - 6" 60° Carbide Trail Blazer IV™ | TPI4-1225 | DP6-1225 | SP6-1225 |
| (W) - 8" 60° Carbide Executive™ | WPI-1225 | DP8-1225 | SP8-1225 |
| (A6) - 6" 60° Carbide Square ACE™ | AP6-1225 | N/A | N/A |
| (A8) - 8" 60° Carbide Square ACE™ | AP8-1225 | N/A | N/A |

When installing a 1225 runner you will not insert a bolt in this hole.
