

187 Stud Pattern development with the Long Track Template

The 187 stud pattern is recommended for snowmobiles with a two-ply 128"/325cm track length with a 2.52 pitch. To create this pattern, you will use the 198 single stud pattern from the Long Track Template pictured below. The part number for the correct template is LONG-TEMP-2.

Follow the directions accompanying the template.

The 128"/325cm track has 3 less bars than the 136"/345cm track, so the pattern will only be repeated 17 times to complete the 187 stud quantity on a 128"/325cm track.

If you have any questions about marking this pattern, contact Woody's tech line.
